

COCKY

Sfera Ebbasta,

Sfera Ebbasta customises Cocky, an over-the-top armchair that can only fly high. The unconscious desire to fly that unites humans should always be combined with that ability to seize prey that is typical of the noblest birds. The armchair imagined by Sfera Ebbasta tries to bring these two souls together through armrests that unfurl like wings and a polished gold finish claw base. "I am happy to bring my artistic vision to the world of design. Those who know me know how important style is to me and an artist today has to be able to be 360 degrees." Sfera Ebbasta

Coffee table with thick top made of mdf covered on the edge in faux fur, top in mirror polished stainless steel. Base on four spokes in rigid polyurethane with shiny gold sputtering finish.
