

APIAN PLUS

With an elegant aesthetic, the Apian table takes an architectural design approach and has been meticulously crafted from exquisite materials. Its airiness is reminiscent of a curved and inclined metal sheet, creating a base with a bold and sharp shape that culminates in a top equipped with a patented mechanism allowing it to be extended to up to 3 metres in length.

The edge of the top echoes the shade of the base which has been detailed with coated double-sheet metal that gleams and catches the light, illuminating an area that would otherwise be left in the dark.

Apian is one of those unexpected pieces that will instantly turn around an interior design project.
