Byron Aluminum Dining Chair

Our Byron Aluminum collection blends sophisticated styling with an architectural play of angles to create exceptional design. A unique take on the typical dining chair, the Byron Aluminum Dining Chair was designed as the perfect outdoor seating — enjoy an all-weather Batyline mesh seat for comfort, supported by a handcrafted powder coated extruded aluminum frame with a matching stretcher at the bottom for visual interest. With a subtle elegance, this highly usable piece instantly enhances any space.

FEATURES

- Frame handcrafted of extruded aluminum in our workshop
- Superior quality powder coating applied for weather resistance
- Batyline mesh sling suspension adds comfort to the sit and overall functionality. Batyline mesh is easy to clean, as well as resistant to fading, stretching and stains.
- If the furniture will remain covered and not used frequently, we recommend periodically taking off the covers to allow moisture and humidity to dissipate from inside allowing the furniture to breathe. This helps reduce trapped humidity if the furniture is not regularly used.

Width:	19.9 in / 505 cm
