## Porto Aluminum Dining Chair

A contemporary and classic study in soft curves, our Porto collection creates a natural interplay between shadow and light with sculptural forms in the base. The Porto Dining Chair is true comfort — featuring a frame of thin aluminum tube in Aluminum Bone upholstered in performance textiles in Riviera Ivory. Streamlined and elegantly simple, this great all-around outdoor dining chair echoes the signature curves and rounded shapes of the collection's tables and pairs nicely with a variety of other collections as well. Place it with any dining table to complete your outdoor dining set.
