

HARBOUR

Byron Teak Extension Dining Table

Our Byron collection blends sophisticated styling with an architectural play of angles to create exceptional design. Our star dining table, the Byron Extendable Dining Table was designed as the perfect outdoor table for up to twelve — featuring a handcrafted solid Indonesian teak frame with curved corners and legs and built-in flexibility thanks to a folding extension leaf. Brass-toned accents highlight the luxury inherent in the craft and really set this table apart. Built to last, this highly usable piece instantly enhances any space with its subtle elegance. When the table is extended, the length of the table increases to 155.1 inches, allowing for more guests to sit around the table.

FEATURES

- Frame handcrafted of sustainably sourced solid Indonesian teak in our workshop
- When properly maintained and cared for, teak is the ideal outdoor material with its natural resistance to weather, cracking and rotting. Please refer to our Care + Maintenance Guide for additional information about the care and natural beauty of teak
- An included pull-out leaf — concealed in the center — provides additional seating. The table sits 8–10 guests comfortably when closed. And sits 10–12 comfortably when extended. Extended length increases to 155.1 inches with the leaves folded up
- If the furniture will remain covered and not used frequently, we recommend periodically taking off the covers to allow moisture and humidity to dissipate from inside allowing the furniture to breathe. This helps reduce trapped humidity if the furniture is not regularly used.
